### HOW TO CLEAN YOUR WHIRLPOOL

1. Fill tub with water about two to four inches above the jets.
2. Turn on the pneumatic switch. (Do not run without water at the suggested level.)
3. Add 2 to 3 tablespoons of automatic dishwashing detergent to the clean water and run for about 5 minutes. This will freshen and clean the systems. Turn whirlpool off and drain.
4. Refill tub and let system run with clean water for five more minutes to finish the cleaning.
5. To sanitize your whirlpool, follow steps 1 and 2, then add 1 cup of Clorox to the clean water and run for 5 minutes. Turn the whirlpool off and drain.
6. Refill the tub and let system run for five more minutes to finish the sanitizing.
